1. OVERVIEW OF SASSA

The South African Social Security Agency (SASSA), listed as a schedule 3A public entity in terms of the PFMA, is an extension of government's delivery arm that administers the delivery of social grants to the poor people in South Africa. The Agency aims to deliver quality and comprehensive social security services in partnership with various stakeholders.

The founding legislation of the Agency is the South African Social Security Agency Act of 2004. The SASSA Act makes provision for the effective management, administration and payment of social assistance and services through the establishment of the South African Social Security Agency.

The key functions of SASSA are the administration and payment of social grants and include:

- a) The processing of applications for social grants;
- b) On-going entitlement reviews of beneficiaries;
- c) Disbursement and payment of grants to eligible beneficiaries;
- d) Quality service assurance ensuring compliance with norms and standards; and
- e) Fraud prevention and detection.

SASSA disburses payments to beneficiaries for the following types of social grants:

- a) Old Age Pension;
- b) War Veterans;
- c) Disabled Persons;
- d) Grant-in-Aid;
- e) Child support;
- f) Foster Child;
- g) Care Dependency, and
- h) Social Relief of Distress.

2. BACKGROUND

SASSA currently has the Enterprise Project Governance Tool (EPGT) that enables the Agency to manage projects from initiation until implementation. The Application tier in EPGT includes the following:

- Project Web App;
- Microsoft Project Server 2013;
- Microsoft SharePoint Server 2013;
- Microsoft Project Server Interface;
- Microsoft Project Server 2013 Events service;
- Microsoft Project Server 2013 Queue service;
- Microsoft Exchange Server; and
- Nintex Workflow.

The EPGT is developed on Microsoft Project Server 2013 and it is accessed through the Project Web App. Currently the EPGT uses the Nintex workflow. The Nintex workflow is an event driven workflow that orchestrates project allocated activities, and is embedded within the Microsoft Project Server. The EPGT is aligned to Information and Communication Technology (ICT) project management framework.

The EPGT has become obsolete and cannot be maintained which has resulted in the Agency not being able to monitor the projects and to get technical assistance from the OEM. It is with this background that SASSA seeks to procure an Enterprise Project Governance Tool to manage and monitor projects.

Please note that SASSA has five (5) Power BI Pro Sub per User licences and 100 Project P3 FSA Sub per User licences.
